

## How to enter the code generated by Nokia Calculator

To enter code to phone (must be powered on no SIM card inside).  
Code should be putted to phone as below:

```
#pw+????????????+1#  
#pw+????????????+2#  
#pw+????????????+3#  
#pw+????????????+4#  
#pw+????????????+5#  
#pw+????????????+6#  
#pw+????????????+7#
```

Here: ?????????????? you should enter generated code.

Of corse when enter:

- first code in the end of the string mus be added + 1#
- code number 7 in the end of the string must be added + 7#

If You have proper software and You know on which lock phone is closed just simply enter proper CODE.

If YOU DONT KNOW - which lock is closed do the following:

1. Enter first code. If it wrong code - WAIT 30 seconds!!! and then:
2. Enter code number seven this will open all locks.

How to get 'p' 'w' '+' signs?

Press \* several times on keyboard of phone...

ATTETNION!!!

IF SOMETHING IS WRONG WITH THE CODE EMAIL US  
BEACOUSE WHEN YOU PUT IT TO MANY TIMES (MORE THEN 5)  
YOU WILL LOCK THE CODE UNLOCK FUNCTION AND  
IT WILL BE POSSIBLE TO UNLOCK IT ONLY BY CABLE
